Building on the reliability of the gravity designed Monterey, the Forsaire Counterflow series features an integrated blower for floor-to-ceiling circulation of heat throughout the room or home. Optional outlet accessories allow it to heat up to three rooms.

**TOP-VENT COUNTERFLOW**
Models may be recessed into the stud space or surface-mounted and vented vertically through the ceiling and roof.

**DIRECT-VENT COUNTERFLOW**
Having a sealed combustion chamber, our Direct-Vent Counterflow Furnaces use only outside air for combustion. All by-products of combustion are discharged to the outside through the wall vent. All venting materials are included with these models.

**ELECTRIC COUNTERFLOW**
The practical choice for areas where natural or propane gas is not convenient to install. These models are ideal for basements and room additions.

**FEATURES**
- Free-standing or recessed mounting
- Multi-room heating with optional outlet kits
- Automatic temperature and safety controls

**TOP & DIRECT-VENT MODEL FEATURES**
- Natural or propane models (conversions kits available)
- “Matchless” pilot igniter
- Resettable vent-limit safety switch
- Equipped with a 4’ electrical power cord
