FOR IMMEDIATE RELEASE

Williams Releases *CARMEL*™ Family of High Efficiency Wall Heaters

COLTON, CA, July 21, 2023 – Williams, a leading provider of HVAC heating and cooling equipment, announces the release of the AC2030TNA top vent wall heater, the first in a next generation family of 82% efficiency wall heaters for the residential market.

The *CARMEL*™ AC2030TNA offers superior comfort and efficiency with 82% AFUE and ultra-low NOx emissions. For energy and heating cost savings, it is engineered with dynamic response and a constant and comfortable temperature – just enough for your heating environment. No standing pilot eliminates seasonal relighting, saving energy and eliminating methane emissions. It is easy to install and fits into the same opening and uses the same venting as the traditional Monterey wall furnace.

Installers can choose between two power kits – an internal AC power supply kit and an external kit that can be wired into the home’s power supply. For additional energy savings and comfort, the *CARMEL* AC2030TNA includes an easy-to-use programmable thermostat.

Additional releases to the *CARMEL* family with additional features and higher efficiency will be introduced next month.

“It’s an exciting time at Williams as we implement the next bold phase of the company’s growth,” said Tinh Pho, President and General Manager. “Our century tenure and expertise in the space heating market has allowed us to develop this highly efficient family of wall furnaces that offer superior features and unmatched performance with exceptional value.”

About Williams

The Williams name is synonymous with the highest quality and most popular line of HVACR products to fit any residential or commercial need, including gas and electric furnaces, fan coils and air handlers. Williams is headquartered at its 400,000 square foot manufacturing complex situated on over 18 acres of land in San Bernardino County, CA.

Williams’ products are installed in residential homes, hotels, casinos, museums, dormitories, and apartment complexes and are featured in many historically significant landmarks including Columbia University, The Smithsonian Institute and onboard Air Force One. Our products are sold nationwide through a network of authorized HVACR representatives, wholesalers, and retailers.
